

StillSpace

# PRECEDENT

“Environmental factors play a large role in how people perceive and use space [...] The need for control of noise, need for quietness, and acoustical privacy appeared as vital factors needed for successful work/study spaces.”

- Association of College & Research Libraries, 2018

# TARGET MARKET

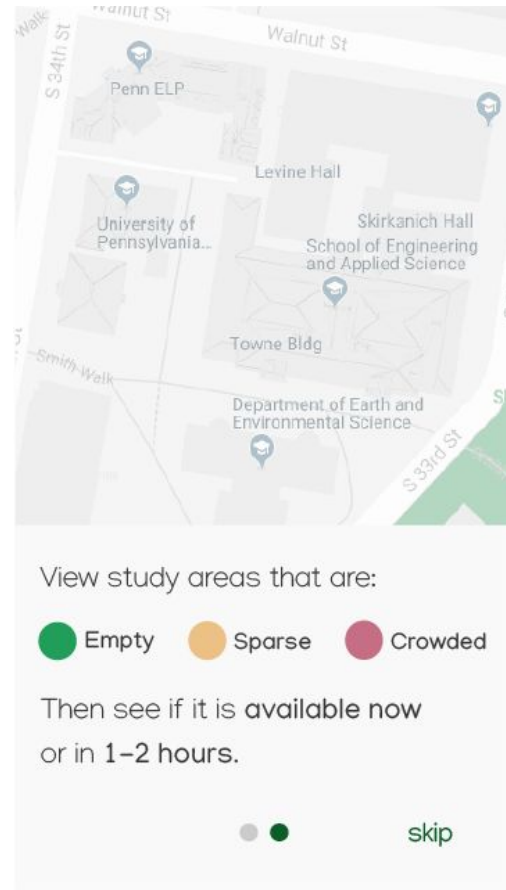

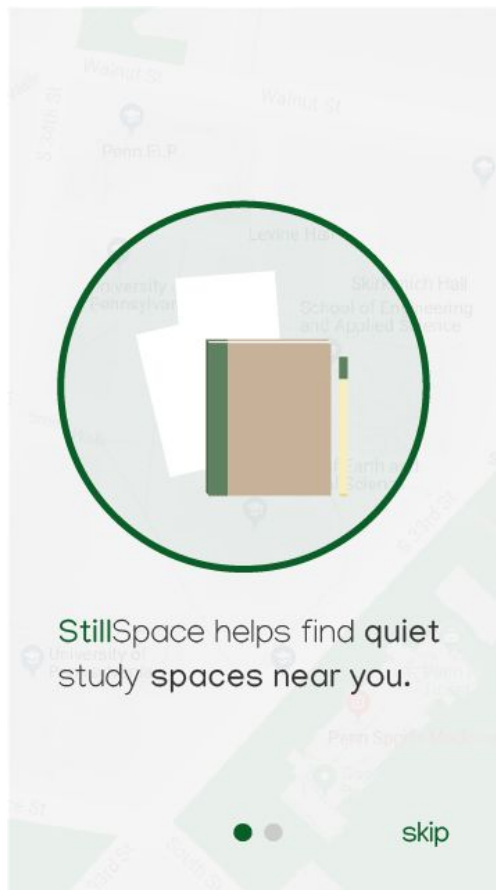

University Students

Continuing Learners

Self-Educators

# SOLUTION

A data-driven mobile application that utilizes crowdsourcing (and machine learning) to inform students where there is a quiet place to study.

A grayscale map of the University of Pennsylvania campus is shown, with various buildings and streets labeled. Overlaid on the map is the word "DEMO" in a large, bold, black sans-serif font. The map includes labels for streets such as Walnut St, S 33rd St, S 34th St, and S 32nd St. Building names include Hill College House, Singh Center for Nanotechnology, Penn ELP, Levine Hall, Skirkanich Hall, School of Engineering and Applied Science, Towne Bldg, Department of Earth and Environmental Science, Department of Physics and Astronomy, David Rittenhouse Laboratory, The Palestra, and Hutchinson Gymnasium. Icons for a pharmacy (CVS), a school of design (Stuart Weitzman School of Design), and a school of engineering are also visible.
